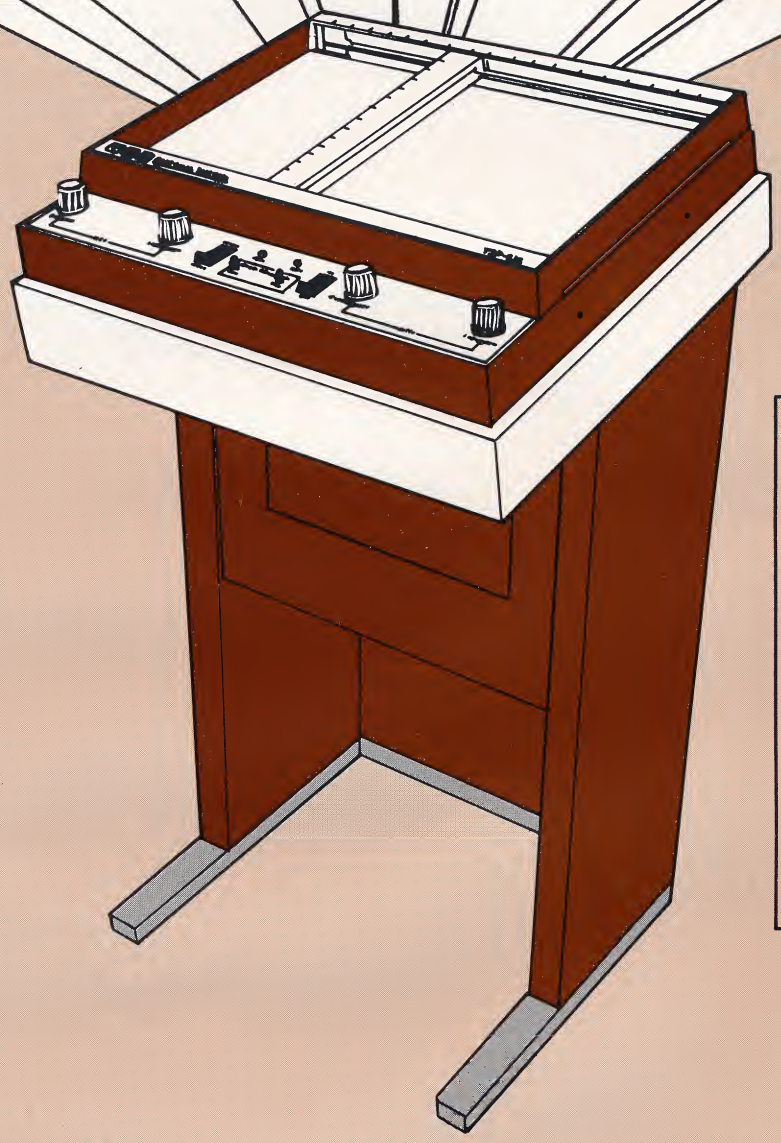
TSP-212

THE NEW LOW COST PLOTTING SYSTEM FOR TIME SHARE USERS!



Suction w/d paper down.

- **FAST**
  INCREASES THE EFFICIENCY OF YOUR TERMINAL USEAGE
- **ECONOMICAL**
  LOW INITIAL COST & TERMINAL COST
- **TIMELY**
  PUTS THE TIMELINESS & VERSATILITY OF TIME SHARE PLOTTING AT EVERYONE'S DISPOSAL

SPECIFICATIONS

X-Y PLOT DIMENSIONS	Continuously adjustable up to max. plot size of 11″ x 17″.
RESOLUTION	1/512 of full scale (9 BIT in each axis)
ACCURACY	±1/256 of full scale (8 BIT)
AMBIENT TEMP.	15°C to 40°C
POWER	115 VAC ±10%, 60 Hz.
PLOTTING SPEED	150 to 225 points per minute depending upon particular system used.

TSP CORP. TIME SHARE PERIPHERALS CORPORATION Box 361, Wilton, Connecticut 06897 • (203) 762-3348

This new TSP-212 Plotting System combines, in a modern console, the field-proven reliability of the TSP-12 Plotter Controller, and the well-known dependability of a Honeywell X-Y recorder. It speeds and economizes time-sharing EDP wherever graphics are useful.

Versatile, the TSP-212 System connects directly to the IBM 2741, IBM 1050, Teletypes, and most other terminals. Interface through the data set or coupler is accomplished with a simple, single-cable connector. All controls are conveniently positioned on an easy-to-read front panel, and plot size is continuously variable up to a maximum of 11″ x 17″. Solid state electronics ensure long service life and ease of maintenance.

BASIC and FORTRAN sub-routines accepted by most time-share systems and major-make computers are supplied cost-free with the new TSP-212. The routines are useable with many computers not having full ASCII code-set output capability. The TSP-212 makes the speed and convenience of data plotting available to time-share users who could not previously utilize graphic plotting.

Software is written so that scaling and dimension factors are easy to use and operator oriented; alpha-numerics and symbols routines offer equal facility.

Ask for more information about the TSP-212 Plotting System, and find out how it can help your time-share program.

New, fast, and efficient!

$3300 TTY w plug.

The TSP-212 Plotting System is a real swinger. It fits almost any time-share application where high-speed, economical EDP graphics are essential. Connects directly to Teletypes, IBM 2741's, and most other terminals. Plot sizes are continuously variable up to 10″ x 15″ on 11″ x 17″ paper, with pushbutton facility. Software is supplied in BASIC and FORTRAN, including subroutines for curve smoothing and alpha-numeric symbols. The TSP-212 incorporates the work-proven TSP-12 Controller and a specially-designed Honeywell X-Y recorder.

Come on, compare the TSP-212 — $3,300 COMPLETE — before you buy any plotting system. You'll be drawing on a reliable source.
